

IVS Inc. FANUC REPAIR ROBOT AND CNC CONTROLS

- **Servo Amps**
- **Teach Pendants**
- **Servo Motors**
- **Power supplies**
- **Processors**

A staff of highly trained and experienced technicians performs FANUC repair services for many large manufacturing companies. IVS' robot and cnc divisions specializes in performing component level repair of robotic and cnc systems, including servo amplifiers; teach pendants, main processor boards, power supplies and more.

Our FANUC simulators test electronic assemblies exactly the way they are used in the production environment.
