

IVS Inc. Motor Shop is second to none in North America.

Our staff of highly trained and experienced motor technicians repair/rebuild all brands of motors, including **Servo**, **AC/DC** and **Spindle**.

Our extensive testing capability and quality Parts, Machining and Rewind Departments have all the right tools to confirm a **QUALITY** repair – it's what separates us from the competition.

Every motor feedback (Encoder, Pulse-coder, or Resolver) is fully rebuilt and closed loop tested with "Mitchell Box" or an actual system engineered to simulate functions and load. Finally, our Turnaround can be stated in Hours rather than Days.
